CYBER-PHYSICAL SOCIAL SYSTEMS · SAINT-ÉTIENNE, FRANCE

Dawood Fayad

Master's student working at the intersection of multi-agent systems, intelligent transport networks, and embedded systems - building tools that turn mobility data into usable, real-world scenarios.

EXPERIENCE

Apr 2026 – Jul 2026

Research Intern - Multimodal Scenario Generation for MaaS

IRIT, Toulouse, France

- Extended open-source activity-based mobility pipelines to generate configurable MaaS travel scenarios.
- Built a web scenario generator with FastAPI and Vue 3 for population parameters and spatial bounds.
- Integrated GTFS, GBFS, and urban mobility feeds into structured exports for routing evaluation.

Nov 2023 – Aug 2025

IT Support Agent

Securealm S.A.L. Offshore, Beirut, Lebanon

- Provided technical support by email and remote desktop, diagnosing software and hardware issues.
- Handled installation, configuration, and maintenance of client software and office lab equipment.

Mar 2023 – Apr 2023

IT Intern

Lebanese International University, Beirut, Lebanon

- Deployed Windows and Linux systems and configured network hardware.
- Assembled workstations and replaced malfunctioning hardware components.

EDUCATION

2025 – Present

Master's in Cyber-Physical Social Systems (CPS2)

Université Jean Monnet & École des Mines, Saint-Étienne, France - Multi-Agent Systems, Embedded Systems, Semantic Web, Digital Twins

2019 – 2023

Bachelor's in Information Technology

Lebanese International University, Beirut, Lebanon - Computer Networks, System Administration, OOP, Web Development

TECHNICAL SKILLS

Software & Web Development

Java, C++, Kotlin (Android), Spring Boot, Vue.js, FastAPI, Python, PHP, SQL, HTML/CSS, JavaScript, RESTful APIs

Data & Mobility Technologies

Data Processing & Analytics, Geospatial Data Management, Transport Data Standards

Networking & Tools

CCNA-level Networking (routing, switching, VLANs), Linux, Git

Distributed & Intelligent Systems

Multi-Agent Systems, Semantic Web Technologies, Activity-Based Mobility Modeling

Embedded Systems & Hardware

MicroPython, CircuitPython, Sensor Integration

SOFT SKILLS

- Autonomy & Self-Directed Learning
- Technical Communication & Documentation
- Analytical Problem Solving & Troubleshooting
- Team Collaboration & Time Management

LANGUAGES

- **Arabic:** Native
- **English:** Fluent
- **French:** Beginner (Currently Improving)
